Of note, Boston IVF has a program for fertility preservation for oncology patients that includes a rapid consultation followed by egg freezing typically within 1-2 weeks in new diagnosis of breast cancer or other cancers where treatment may threaten gonads. Pietro Bortoletto and Denis Vaughan head up this program at BIVF (Pbortoletto@bostonivf.com; dvaughan@bostonivf.com)

[BMC Reproductive Endocrinology Clinic](#): Specializes in treatment of reproductive endocrinology disorders and provides fertility preservation consultation. ART is available in collaboration with other IVF clinics.
